

Training theme:	NPMS Introduction to Marsh and Fen habitats
Theme Aims:	This <i>Introduction to Marsh and Fen Habitats</i> presentation aims to give you a good understanding of the vegetation in this NPMS habitat, especially in terms of: <ul style="list-style-type: none">• the definition of the habitat and its two subdivisions,• the main vascular plant species present,• the range of floristic variation, and• an appreciation of the range and variety of ecological interest.
After following this presentation, you should:	Have a better understanding of Marsh and Fen Habitats and its vegetation and flora in the UK, and a better eye for identifying variation in the plant communities found as well as recognizing various individual plant species.

Please feel free to fill out the below questions to keep for your own development records.

I have enjoyed finding out about:	
Key things I have learned through following these materials:	
Areas I am more confident in following this course:	
Areas I am still not confident and would like more information/experience:
